SUMMARY

A self-driven, keen, and enthusiastic individual with expertise in web and software development, dedicated to designing and implementing efficient, responsive, and innovative systems that enhance organizational performance. Eager to take on meaningful challenges that foster growth, collaboration, and adaptability, while continuously advancing my technical proficiency and contributing to the company's long-term success.

EDUCATION

Technological Institute of the Philippines   Quezon City, Metro Manila
Bachelor of Science in Information Technology   2021 - 2025
- *Dean's List Academic Achievement Award recipient*

Olivarez College   Paranaque City, Metro Manila
Science, Technology, Engineering, and Mathematics (STEM)   2019 - 2021
- *With Honors*

SKILLS & INTERESTS

Frontend Development: Next.js, React.js, Typescript HTML, CSS, JavaScript, Tailwind CSS| Used to builds responsive, user-friendly interfaces.
Backend Development: Node.js, Express.js, PHP | Used to create the logic and server connections that make web apps run efficiently and securely.
Programming Languages: JavaScript, PHP, Python (Basic) | applied for full-stack development and automation tasks.
Database Management: MongoDB, Oracle SQL, Oracle | used to store, organize, and manage application data safely and reliably.
UI/UX Design: Figma | used to design clean and interactive layouts that make applications easy to use and visually appealing.
3D Modeling & Animation: Blender, Unity | used to design and animate 3D environments and objects for games and interactive media.
Tools & Platforms: VS Code, Git, GitHub, Postman, Oracle VirtualBox | used for coding, version control, testing, and project deployment.
Soft Skills: Strong problem-solving, collaboration, communication, and time management abilities with adaptability to dynamic environments.

PROJECTS

- **Pet City Veterinary Clinic (Oracle SQL)** - An online appointment system with secure Oracle SQL data storage for pet owners, helping streamline scheduling and improve service efficiency.)
- **Blog Website (Next.js, Typescript, Tailwind, Supabase, PostgreSQL)** - A Facebook-like blog built with Next.js and TypeScript, powered by Supabase with PostgreSQL for authentication, posts, and comments.
- **Real-Time Chat Application (React.js, Node.js, Express.js, MongoDB, Socket.IO, Tailwind CSS)** - Real-time chat app with JWT authentication and a Messenger-like interface, enabling instant communication between users.)
- **Taberna Foods Inc. (Intern Project) (JavaScript, MySQL)** - A payroll management system for tracking employee records, salaries, and attendance for administrative use.)
- **Jetbest Payroll System (Intern Project) (JavaScript, MySQL)** - An employee management system with role-based access, allowing admins and employees to manage and view records efficiently.)
- **Hotel Reservation System (React.js, Node.js, MongoDB, Tailwind CSS)** - Full-stack hotel booking platform featuring room availability management, secure user authentication, and real-time reservation tracking.)

WORK EXPERIENCE

Project Technical Assistant III - Local Field Personnel
University of Science and Technology of Southern Philippines (USTP - CDO Campus)   *July 2025 – October 2025*
- Assisted electronics technicians in inspecting and maintaining utility poles across NCR.
- Supported field operations by documenting findings and ensuring equipment safety compliance.
- Contributed to efficient coordination between on-site teams and project supervisors.

Angkas Rider
Angkas Tagumpay Center   February 2023 – Jul 2025
- Ensured safe and timely transport services with 98% customer satisfaction.
- Delivered 500+ successful rides while maintaining excellent professionalism and punctuality.

Back-End Developer (Intern)
8Box Solutions, Inc.   *February 2025 – May 2025*
- Fixed and optimized JavaScript functions to improve system reliability.
- Handled and updated MySQL data to maintain accurate project records.
- Assisted in testing and debugging to ensure smooth feature performance.
